EXPERIENCE

E-Commerce - Front End
React.js - Redux - React Router - Html - Css
E-Commerce developed through an API. I know
I use Material UI, to develop the site environment
Web. A functional shopping cart was created,
product filtering by category and start of
session.
https://ecommerce-rct-app.netlify.app

Pokedex - React.js - Front End
React.js- Redux - React Router - Html - Css
Pokédex developed through an API. all pokemons were listed in a search engine and can be filtered by categories. I created one quick view card and detailed card.
